

COLLATOR MACHINES

Model: SR412, SR410, SR406

 **High-Speed Suction Feeding**

 **Multiple Station Configurations**

 **Automatic Digital Stitching System**

 **Versatile Paper Handling**

COLLATOR MACHINES

Model: SR412, SR410, SR406

These collating machines are designed for high-speed and precision paper handling, making them ideal for professional printing, binding, and finishing applications. These machines feature advanced suction feeding technology, allowing for smooth and consistent collating of a wide range of paper sizes and thicknesses, including coated and folded materials up to 300 gsm and with multiple station configurations, including 6, 10 or 12 stations, these collators are efficiently assemble leaflets, brochures, and catalogs with minimal manual intervention. Each station is equipped with friction roll feeders and intelligent sensors to detect missing or double sheets, ensuring flawless collation. Additionally, the machines integrate seamlessly with booklet-making and trimming units, streamlining production for stitched and folded booklets.

Model	SR412	SR410	SR406
Number of bins	12 bins	10 bins	6 bins
Processing speed	4,500 sets per hour (A4)	4,500 sets per hour (A4)	4,500 sets per hour (A4)
Paper size (L x W)	Max: 490mm x 330mm Min: 120 mm - 300 mm	Max: 490mm x 330mm Min: 120 mm - 300 mm	Max: 490mm x 330mm Min: 120 mm - 300 mm
Paper thickness	45-150 gsm	45-150 gsm	45-150 gsm
Bin volume	28 mm (300 sheets 70 gsm)	28 mm (300 sheets 70 gsm)	28 mm (300 sheets 70 gsm)
Stacking mode	criss cross, straight	criss cross, straight	criss cross, straight
Stacking volume	65 mm (650 sheets, 70 gsm)	65 mm (650 sheets, 70 gsm)	65 mm (650 sheets, 70 gsm)
Power	110V~220V, 50Hz/60Hz, 150W	110V~220V, 50Hz/60Hz, 150W	110V~220V, 50Hz/60Hz, 150W
