# Hydraulic Paper Cutter

Model: H720RT

The H720RT Hydraulic Paper Cutter is a high-performance cutting machine designed for precision, durability, and efficiency. Equipped with a powerful hydraulic cutting system and boasting its 720mm cutting width, it can handle larger sheets, making it perfect for processing posters, and bulk paper stacks with ease. Its digital control panel with touchscreen functionality allows users to quickly set cutting dimensions, store multiple presets, and achieve exact measurements with minimal effort. For safety, the H720RT is fitted with an infrared safety protection system that prevents accidental injuries by automatically stopping the machine when objects interfere with the cutting path. Additionally, an emergency stop button provides instant halting for added security. The LED cutting line indicator further enhances precision by clearly projecting a guideline, ensuring perfect alignment before cutting.
